

GERMAN GORODNEV

Javascript Developer

Experienced Full-Stack Javascript Developer with a 5-year track record in both backend and frontend environments. Passionate about designing and developing innovative applications with Node.js and React. Committed to delivering high-quality products with best design practices in mind.

Work experience

Javascript Developer Lionstep

April 2021 — Present

- Maintained and developed a Chrome extension that is integral to daily internal operations.
- Collaborated closely with end-users to improve their workflow, increasing efficiency and satisfaction.
- Refactored the entire project from JavaScript to TypeScript and migrated it to Manifest V3.
- Enhanced developer experience by adding end-to-end tests (Playwright) and implementing CI/CD pipeline.

Full-Stack Developer W1D1

December 2020 — December 2023

- Rewrote the project from Express.js with Flow to NestJS with TypeScript, improving overall code quality.
- Developed GraphQL backend, ensuring client-server contract using code generation tools.
- Implemented Test-Driven Development approach using unit and E2E testing.
- Used different AWS products like S3, Lambda, Elastic Transcoder.
- Developed custom-built solution for activity streams, eliminating the need for an external service.

Backend Developer Nuzzle

February 2020 — November 2020

- Solely responsible for developing the backend of a dating app using Node.js (NestJS).
- Designed efficient PostgreSQL database structure.
- Implemented ranking algorithms in Elasticsearch for the core functionality.
- Adopted Clickhouse for analytics.
- Worked with Firebase, IAP, push notifications, and deep linking.
- Developed admin frontend using React/Redux.
- Managed infrastructure in GCP (Docker, App Engine).

Javascript Developer Extension Forces

May 2018 — March 2020

- Developed various Chrome extensions.
- Improved my skills in code bundling, CSS modules, cross-browser layout, Web APIs and TypeScript.
- Successfully managed developer teams and communicated with the clients.
- Used Node.js with MongoDB for backend services.
- Developed expertise in web automation and scripting with tools like Puppeteer.
